INTRODUCTION

Interest in Women and Development (WAD) as part of development cooperation activities with the Yemen Arab Republic (Yemen) has been increasing in recent years. The Dutch Government pays special attention to women in its development cooperation work. Yemen enjoys the status of programme country. More insight into and knowledge about the situation of women is essential to continue and expand WAD activities in Yemen.

In this bibliography an overview is given of all reports, articles and books in western languages that could be traced and which contain information about (aspects of) the lives of women in the Yemen Arab Republic, in alphabetical order and for most references also per subject. In order to facilitate the use of these sources by interested parties, finding-places in Yemen are listed underneath a reference wherever possible.

It has been compiled first of all for the women working in Dutch/Yemeni development cooperation activities. They requested assistance in obtaining knowledge regarding women in order to improve the outcome of their work to a Dutch WAD mission, visiting Yemen from October 28 until November 14, 1986. Naturally, it is of interest to all Yemeni and expatriate individuals and institutions dealing with women's issues.

Previously unmentioned reports have also been included. This does not necessarily mean that they are accessible. Directors of projects and organisations reserve the right to hand over unpublished materials to their discretion. On the other hand, it has been stressed that reference sections would be visited more frequently, now that they would be mentioned in this report.

I would like to express my gratitude to SNV, BOCID, Oxfam, British Council, AIYS, Yemeni Center for Research Studies, Ministry of Agriculture and Fisheries, USAID, Unicef, Tihama Primary Health Care Project, UNDP as well as unnamed individuals for their kind and generous assistance. Special thanks are due to Ms. Audrey Dibble, the former librarian at the Ministry of Agriculture and Fisheries, who has helped me tremendously by providing references, enthusiasm and support.

---

1An overview of current knowledge and developing ideas regarding WAD in Yemen is given in J. Buringa, 1988, Yemeni women in transition, how development cooperation fits in The Hague/DGIS
